- \* Custom fit slider iPhone pocket for quick and easy access
- \* Slip pocket on back for paper work
- \* Removable, adjustable shoulder strap
- \* Quick grab handle
- \* Slim profile for an elegant solution for your laptop carrying need

## **Targus Hard Sided Slip Case**

Protecting your precious MacBook® & MacBook® Pro is easy with the Targus Dual-Purpose Hardsided Slipcase. This Slipcase fits a 13" laptop. Our clever designers have come up with a case that can be used on its own, inside another case or even as a lapdesk when you are on the go. The hard finish EVA outer shell acts as a protective barrier while the inside of the case is lined with a unique foam construction system to safeguard the laptop from damage.

**Comments:**

The STM Armour offers the best protection for the laptop. Wollongong CEO (similar size to Sandhurst) started off with Targus bags in their initial rollout and suffered a huge amount of screen damage. They have since swapped all schools to the Armour Bags and significantly reduced their cost in repairs.

All three STM bags provide space for power adapter and cables.

The Targus hard sided case can be unzipped on three sides and the laptop used while still in the case.

The Targus case provides no storage for power adapter or cables.
